

Financial Tear Sheet

Corporate Profile

Sky Solar is a global independent power producer (“IPP”) that develops, owns and operates solar parks and generates revenue primarily by selling electricity. Since its inception, Sky Solar has focused on the downstream solar market and has developed projects in Asia, South America, Europe, North America and Africa. The Company’s broad geographic reach and established presence across key solar markets are significant differentiators that provide global opportunities and mitigate country-specific risks. Sky Solar aims to establish operations in select geographies with highly attractive solar radiation, regulatory environments, power pricing, land availability, financial access and overall power market trends. As a result of its focus on the downstream PV segment, Sky Solar is technology agnostic and is able to customize its solar parks based on local environmental and regulatory requirements.
