

Sky Solar Schedules First Half 2017 Earnings Release and Conference Call for September 28, 2017

9/26/2017

HONG KONG, Sept. 26, 2017 (GLOBE NEWSWIRE) -- Sky Solar Holdings, Ltd. (NASDAQ:SKYS) ("Sky Solar" or the "Company"), a global developer, owner and operator of solar parks, today announced that it expects to release financial results for the first half of 2017 ended June 30, 2017 on Thursday, September 28, 2017 before the US market open. The Sky Solar management team also expects to host an investor conference call at 8:30 a.m. Eastern Time (8:30 p.m. Hong Kong Time) the same day.

Dial-in details for the live conference call are as follows:

International: +61-2-9193-3761
United States: +1-800-239-9838
Hong Kong: +852-3008-1527
Passcode: 6392388

A simultaneous live webcast will be available on the Investor Relations section of the Company's website at www.skysolarholdings.com.

A telephone replay will be available approximately two hours after the call concludes through October 4, 2017. The dial-in details for the replay are as follows:

International: +61-2-9101-1954
United States: +1-888-203-1112
Hong Kong: 800-901-108
Passcode: 6392388

About Sky Solar Holdings, Ltd.

Sky Solar is a global independent power producer ("IPP") that develops, owns, and operates solar parks and generates revenue primarily by selling electricity. Since its inception, Sky Solar has focused on the downstream solar market and has developed projects in Asia, South America, Europe, North America and Africa. The Company's broad geographic reach and established presence across key solar markets are significant differentiators that provide global opportunities and mitigate country-specific risks. Sky Solar aims to establish operations in select geographies with highly attractive solar radiation, regulatory environments, power pricing, land availability, financial access and overall power market trends. As a result of its focus on the downstream photovoltaic segment, Sky Solar is technology agnostic and is able to customize its solar parks based on local environmental and regulatory requirements. As of December 31, 2016, the Company had developed 307 solar parks with an aggregate capacity of 292.3 MW and owned and operated 159.6 MW of solar parks.
